Abnormal Uterine Bleeding with DVD: Munro, Malcolm G ...

Abnormal uterine bleeding (AUB) is any variance of the normal menstrual cycle, which is defined on the basis of four parameters (frequency, regularity, duration, and volume). The International Federation of Gynecology and Obstetrics PALM-COEIN classification system improves the understanding of the causes of AUB, facilitates effective history taking and examination, and allows for shared decision-making towards tailored investigations and management plans.

Case studies | eLearning

The term dysfunctional uterine bleeding (DUB) has been used previously to define a diagnosis where there was no systemic or locally definable structural cause for the abnormal bleeding (2). it is a diagnosis of exclusion not an excuse for inadequate investigation. occurs more commonly in adolescents and perimenopausal women (3).

dysfunctional uterine bleeding - General Practice Notebook

Rarely, a thyroid problem, infection of the cervix, or cancer of the uterus can cause abnormal uterine bleeding. In most women, abnormal uterine bleeding is caused by a hormone imbalance. When hormones are the problem, doctors call the problem dysfunctional uterine bleeding, or DUB. Abnormal bleeding caused by hormone imbalance is more common in teenagers or in women who are approaching menopause.

Abnormal Uterine Bleeding: Causes, Diagnosis, and Treatment

Abnormal uterine bleeding describes any variation from normal bleeding patterns in nonpregnant, reproductive-aged women beyond menarche lasting for at least 6 months. Ambiguous and inconsistent use of terminology and definitions to characterize AUB in the past decades necessitated a new, consensus-based approach to nomenclature and AUB evaluation.
