The leading reference for the diagnosis and management of fluid, electrolyte, and acid-base imbalances in small animals, *Fluid, Electrolyte, and Acid-Base Disorders in Small Animal Practice*, 4th Edition provides cutting-edge, evidence-based guidelines to enhance your care of dogs and cats. Information is easy to find and easy to use, with comprehensive coverage including fluid and electrolyte physiology and pathophysiology and their clinical applications, as well as the newest advances in fluid therapy and a discussion of a new class of drugs called vaptans. Lead author Stephen DiBartola is a well-known speaker and the "go-to" expert in this field, and his team of contributors represents the most authoritative and respected clinicians and academicians in veterinary medicine. Over 30 expert contributors represent the "cream of the crop" in small animal medicine, ensuring that this edition provides the most authoritative and evidence-based guidelines. Scientific, evidence-based insights and advances integrate basic physiological principles into practice, covering patient evaluation, differential diagnosis, normal and abnormal clinical features and laboratory test results, approaches to therapy, technical aspects of therapy, patient monitoring, assessing risk, and prediction of outcomes for each disorder. Hundreds of tables, algorithms, and schematic drawings

demonstrate the best approaches to diagnosis and treatment, highlighting the most important points in an easy-access format. Drug and dosage recommendations are included with treatment approaches in the Electrolyte Disorders section. Clear formulas in the Fluid Therapy section make it easier to determine the state of dehydration, fluid choice, and administration rate and volume in both healthy and diseased patients. Updated chapters cover the latest advances in fluid therapy in patient management, helping you understand and manage a wide range of potentially life-threatening metabolic disturbances. Expanded Disorders of Sodium and Water chapter includes information on a new class of drugs called vaptans, vasopressin receptor antagonists that may soon improve the ability to manage patients with chronic hyponatremia. Hundreds of new references cover the most up-to-date advances in fluid therapy, including renal failure and shock syndromes.

Discover the principles and practices behind analytic chemistry as you study its applications in medicine, industry and the sciences with Skoog/West/Holler/Crouch's FUNDAMENTALS OF ANALYTICAL CHEMISTRY, 10th Edition. This award-winning author team presents the latest developments in analytic chemistry today using a reader-friendly yet systematic and thorough approach. Textbook for QA Lab Math.

Filled with easy-to-follow explanations and loads of examples and sample problems, *Mathematics for the Clinical Laboratory, 3rd Edition* is the perfect resource to help you master the clinical calculations needed for each area of the laboratory. Content is divided into three sections: a review of math and calculation basics, coverage of particular areas of the clinical laboratory (including immunohematology and microbiology), and statistical calculations. This new third edition also includes a new full-color design, additional text notes, formula summaries, and the latest procedures used in today's laboratories to ensure you are fully equipped with the mathematical understanding and application skills needed to succeed in professional practice. Examples of calculations for each different type of calculation are worked out in the chapters, step by step to show readers exactly what they're expected to learn and how to perform each type of calculation. Practice problems at the ends of each chapter act as a self-assessment tool to help readers determine what they need to review. Example problems and answers throughout the text can also be used as templates for solving laboratory calculations. Quick tips and notes throughout the text help readers understand and remember pertinent information. Answer key to the practice problems appears in the back of the book. Updated content and calculations reflect the latest procedures used in today's laboratories. Learning objectives at the beginning of each chapter provide a measurable outcome to achieve by the completing the chapter material. NEW! Summaries of important formulas are included at the ends of major sections. NEW! Full-color design creates a more accessible look and feel. NEW! Greek symbol appendix at the end of the book provides a quick

place for readers to turn to when studying. NEW! Glossary at the back of the textbook includes definitions of important mathematical terms.

The author of the game-changing Cannabis Health Index returns with a book designed specifically for general readers who want to understand how THC and CBD can benefit them. While CBD is the new buzzword for health and wellness, many researchers and practitioners believe that the symbiotic relationship between THC and CBD, known as the entourage effect, allows for greater therapeutic benefits for patients. Unfortunately, when it comes to optimizing that ratio to a particular health condition, it is often a process of trial and error for medical patients. Your Cannabis CBD:THC Ratio provides detailed information on how to find the best ratios of CBD:THC and covers the preferred ratios of these two primary cannabinoids for ten prevalent medical conditions—including cancer, chronic pain, anxiety, insomnia, and many others. Blesching's unique chemotype-based system takes into account CBD:THC ratios, the various forms of cannabis medicine available to consumers, and the subjective therapeutic dosages, presenting a complete evidence-based methodology. -- Uwe Blesching, PH.D.

The aim of DNA Analysis by Nonradioactive Probes is to provide a firm background on the basic preparative protocols required for the analysis of nucleic acids by non-radioactive methods, as well as presenting the amazing new applications these methodologies are used on. This volume offers guide chapters on nucleic acid extractions, preparation of nucleic acid blots and labeling of nucleic acids with non-radioactive haptens.
