I wrote this book because after looking far and wide for a similar one which specialized in Web Design for Authors—I couldn't find any! I'm an

author and have written seven books, both fiction and non-fiction.

Not only did I see a deficit of material in the how-to category regarding writing a book but I knew that there was a major gap in finding a Turnkey Manual like this one which covered

Where To Download Hop

not only the writing aspect but how to optimize, promote and setup an Author Website.

Most every web designer I've seen will only set up an author website under the author's name, and then just let it sit there and not optimize it. This will result in

very low to nil exposure on the Web. We actively recommend appropriate domain names and the use of key phrases which are appropriate to your genre and your books, and then above and beyond that we instruct how to optimize

books—several were in print and the others were distributed online. One of the books was a mystery novel, and others were non-fiction books. My passion is writing and web development—my wife and I develop Web Sites for Authors and

Writers. We're copywriters as well so we not only develop the websites but we write the text for them. Without good copy—text—you won't keep the reader's attention. I'm also a Search Engine Optimization
