Timing How To Set Timing Of

1. Hook up your timing light or timing gun. Hook your timing gun up to the power and ground terminals on your car's battery, and hook the sensor that accompanies the timing gun to your number one cylinder spark plug wire. Follow the instructions particular to the timing light you're using to hook it up properly.

Once you feel compression building, look for the zero mark on the harmonic balancer to approach the timing tag. We prefer to set the initial timing for most engines at 10 degrees Before Top Dead Center (BTDC). With that set, remove the cap from the distributor. We're using a Summit HEI distributor. We use a black Sharpie to place a mark on the distributor body where we want the Number One spark plug wire to be located.

How to set your ignition timing - YouTube

The gap is now set and you can check the timing.

Checking the timing: It is necessary to check the timing of the motor because the points must separate exactly at the BTDC point or the engine will run badly.

To do this there are two methods: Statically with use of a small testing circuit or dynamically with a strobe light.
