MySQL in Education. Educational institutions need to develop and deploy a wide variety of database applications from E-learning and student assessment applications to tuition payment processing systems and IT infrastructure applications. At the same time, schools and universities are under constant budget pressure, and need to find a cost-effective solution that frees up funding for other high priority projects.

SQL command for inserting or adding a row of data into the MySQL database table is `INSERT`. The format is as follows: INSERT INTO table\_name (column\_1, column\_2, ... column\_n) VALUES (value\_1, value\_2, ... value\_n); To insert a row of data into table, `INSERT` keyword is followed with keyword `INTO` and a name of the table. Following column names in the parenthesis and separated by commas is optional, but is a good practice to define the columns to be sure that the proper data will be ...
